RECYCLING

A MESSAGE FROM THE MAYOR

Dear Resident,

It has recently been brought to my attention that there are new challenges in the recycling world. Did you know that nearly 1 in 4 items placed in every recycling bin isn't actually recyclable? It was explained that the phrase "one bad apple spoils the bunch" is also true for recycling. One non-recyclable item can spoil an entire batch of otherwise good materials.

Although residents have the best intentions by recycling, according to Waste Management, today, the average contamination rate among communities and businesses is about 25%. These spoiled recyclable materials end up in the landfill.

Often, plastic bags are placed in the recycling bins or other recyclable items are placed in a bag and then into the bin. These bags get tangled in sorting equipment at the recycling plants and cause havoc with the process, which ultimately make it more expensive to separate recycled materials. Plastic bags can be recycled at most grocery stores including Butera or Jewel.

Placing food or liquids in the recycling bin can contaminate all of the cardboard and paper items within and prevent all of them from being recycled.

On a positive note, according to statistics, Lake Villa ranks high in the County in amount of recycling per capita. Now, how do we improve and recycle more? We can all contribute by going back to the basics and apply the same discipline we did years ago to the modern recycling programs.

More information can be found on page 4 under Recycling Guidelines. Also, learn about options for disposal of electronics and other household waste at www.swalco.org.

Keep up the good work!

Jim McDonald
Mayor
