CELEBRATION OF FALL

A MESSAGE FROM THE MAYOR

Dear Residents,

I would like to remind residents of the Police Department's Neighborhood Policing Program. This program is designed to promote a partnership and facilitate communication between the residents and the Police Department. This program gives the citizens a contact within the Department that they can use for non-emergency reasons. Each subdivision is assigned a neighborhood police officer that the resident can contact. You can ask questions, report activity (speeding vehicles, graffiti, extra patrol requests, etc.), give anonymous tips regarding criminal or suspicious behavior, or other general concerns. This program is not meant for in progress or emergency situations. For an in progress situation, please call 9-1-1 for emergency assistance or 847-356-6106 for non-emergency assistance.

You can find the contact information for the officer assigned to your neighborhood by visiting the Police Department Page of the Village website and page 4 of this newsletter. I hope you find this program helpful.

This summer, there will be lots of fun events going on in the Village. There are details on many of these in this newsletter. We will also be posting updates on all of the events on our social media and the Village website. I hope you will have the opportunity to enjoy some or all of them.

Have a safe and happy summer!

Respectfully,

Jim McDonald, Mayor

GENERAL INFORMATION

WHERE DOES YOUR SUMP PUMP DRAIN?

Inflow and infiltration (I/I) are terms for the ways that snowmelt, stormwater runoff, and groundwater make their way into sanitary sewer pipes and eventually get treated, unnecessarily, at wastewater treatment plants.

Inflow is when clear water enters the wastewater system through sump pumps or foundation drains that are illegally connected to sewer lines. Inflow is greatest during major storm events.

Infiltration is when groundwater seeps into cracked or broken wastewater pipes. It is a steady contributor to the problem, causing water that should be filtering down and recharging the areas aquifers to end up going through the Wastewater Treatment Plant and eventually flowing down the Fox River.

I/I is a problem because it uses up fixed capacity in sewer pipes, pump stations and the wastewater treatment plant.

Inflow results in unnecessary expenses that can increase rates for all users. Inflow is a significant problem because during major rain a sump pump can add over 7,000 gallons of clear water to the wastewater system in 24 hours, the equivalent of the normal daily flow from 40 homes. In more extreme rain events, inflow can cause sewer backups into homes and businesses.

Familiarize yourself with your house plumbing system. If you have roof downspouts that are piped underground, a sump pump that has no identifiable discharge point, or foundation drains that don't discharge to the road side ditch or other low point on the lot, you may be contributing to the problem. Disconnect unlawful connections to the sewer system.

Taking these steps will help the environment and reduce unnecessary treatment costs associated with treating stormwater that enters the sanitary sewer system.

VEHICLE LICENSE DISCOUNT RATE

The Village of Lake Villa offers households with seniors 65 and over a discounted rate of \$12.00. Also, any household member who is on active military duty shall not be required to pay the fee.

YARD WASTE PROGRAM

Yard waste pick up begins April 1st and goes through November 28th. Yard waste stickers are now available in the Village Hall. Stickers are \$2.37 each. Residents can also call Waste Management for an annual subscription at 800-964-8988. The annual subscription is \$75.39.

Just place your yardwaste in Kraft style yardwaste bags, put the sticker on the bag, and leave at your curb. Waste Management will pick it up on your normal garbage day.
